

Electrical Part for Forklifts

Forklift Electrical Parts - Lift trucks along with other forklifts can have particular labels for use in certain hazardous locations. The label denotes that this specific model of forklift meets the minimum standards of ANSI/UL 553 used for electric lift trucks or ANSI/UL 558 utilized for internal combustion engine forklifts.

The application for labels utilized for lift forklifts could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Consult your local insurance provider and Fire Marshall for further information concerning the approved uses of industrial powered forklifts in your application.

If the certain forklift satisfies the outlined standards, labels may be placed. A labeled lift truck will show the type of designation placed on the nameplate and would have a properly corresponding label placed.
